

- **Name:** OverWLTTest
- • **Education:** Graduate Student, Computer Science & Medical AI
- • **CV Summary:** Deep learning researcher specializing in 3D medical image analysis. I am currently developing an innovative model for intracranial aneurysm growth prediction using the TRELLIS framework, successfully extracting high-dimensional feature vectors for complex spatial analysis. Extremely proficient in Python, PyTorch, algorithm optimization, and processing complex data structures. I have extensive experience presenting at group meetings and mentoring junior lab members.
